

Texas Risk and Authorization Management Program Certification

The information below is provided as a companion to the TX-RAMP Certification.

Cloud Service Name

3Di, Inc.: 3Di Engage

Cloud Service Provider URL

www.3disystems.com

Cloud Service Description (200 words or less)

3Di Engage is built with a modular architecture and powered by accelerators that reduce implementation time and maximize configurability.

Key Platform Modules

- **Workflow Engine** – Automate business processes with configurable steps, roles, and triggers
- **Case Management** – Track program activities, document actions, and monitor review cycles
- **Document Management** – Upload, tag, version, and track documents across lifecycles
- **Reporting & Dashboards** – Visualize key performance indicators, compliance status, and milestones
- **Role-Based Access Control (RBAC)** – Ensure secure, permission-based access to sensitive actions and data.
- **Audit Logging & History** – Maintain full traceability of changes and decisions
- **Notifications** – Automate alerts, reminders, and escalations via email/SMS
- **GIS & Field Data Tools** – Optional spatial tracking and mobile data capture features

Engage Accelerators

- Prebuilt templates for QA workflows, document routing, and milestone tracking
- Visual form builders and data model designers
- Role-based configuration tools for fast, no-code customization

Common Use Cases

- Environmental compliance & audit tracking
- Public health assessments
- Safety inspections and incident management
- Program performance monitoring
- Permitting, licensing, and reporting workflows
